Bottom 20 cell types by predicted division rate
respiratory progenitor
visceral endoderm
splanchnic mesoderm (intestinal)
myotome
epidermal progenitor (anterior)
trochlear neuron
spinal cord interneuron progenitor
oculomotor neuron
primitive erythrocyte
hindlimb field
apical ectodermal ridge
enteroendocrine progenitor
spinal cord (sacral)
pancreatic-biliary progenitor
otic sensory neuron
thyroid progenitor
primordial germ cell
parietal endoderm
hepatoblast
extraembryonic ectoderm
